DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 79-82.

This application is in condition for allowance except for the presence of claims 79-82 to an invention non-elected without traverse. Accordingly, claims 79-82 have been cancelled.

Allowable Subject Matter

Claims 1-2, 4-42, 44-69, 71-73, 75-78, 83-84, 86-109 allowed.

The following is an examiner's statement of reasons for allowance:

As discussed in the previous office action, an optical switch device and a method of fabricating an optical switch device comprising two movable platforms and a stationary platform created on a substrate having at least two waveguide structures disposed on said platforms are known in the art. Labeye et al (US 5,612,815) explicitly teaches such switching device.

However, none of the prior art fairly teaches or suggests an optical switch device wherein the device comprises first and second semiconductor movable **platforms that are arc-shaped** having switchable waveguiding paths disposed therein, as described and claimed in the instant application.

Art Unit: 2874

The closest art (although it's not a 'prior' art due to it's effective filing date) that *may* be construed as having arc-shape platform is Hsu et al (US 6,836,583 B2). Hsu patent is assigned to the same assignee as the present application, and shares at least common inventors as the present application. In figures 1-3, Hsu discloses a single movable platform that is *warped* along it's horizontal plane due to thermal effects (see also abstract). This may be construed as a platform that is arc-shaped, however this is an *incidental* characteristics of the switching device, and there would be no motivation for one of ordinary skill in the art at the time the invention was made to modify the claimed invention of the present application to have warped platforms as disclosed by Hsu.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

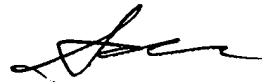

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sung H. Pak whose telephone number is (571) 272-2353. The examiner can normally be reached on Monday- Friday, 9AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney Bovernick can be reached on (571)272-2344. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
